PROFESSIONAL SUMMARY

Full-stack developer specializing in TypeScript, React, React Native, Expo, Next.js, and Node.js. Maintains and enhances production applications for Zkript clients Cavalry (end clients Santos and Arrow Energy) and Hello Again (EVX). Work centers on diagnosing production defects, real-time systems, and release deployment, using PostgreSQL, MySQL, MongoDB, Docker, and Microsoft Azure.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML5, CSS3

Frontend: React, React Native, Expo, Next.js (App Router), Tailwind CSS, shadcn/ui, Radix UI, TanStack Query, React Hook Form, Zustand

Backend: Node.js, NestJS, Express.js, REST APIs, WebSockets (Socket.IO)

Databases and ORMs: PostgreSQL, MySQL, MongoDB, Drizzle ORM, Prisma ORM, Mongoose

Payments: Stripe

Cloud and tools: Microsoft Azure, Docker, Git, GitHub, Turborepo, Bun, npm, Postman

Authentication: OpenID Connect (OIDC), OAuth 2.0, JSON Web Tokens (JWT), Single Sign-On (SSO), Role-Based Access Control (RBAC)

WORK EXPERIENCE

Full-Stack Developer

Zkript | November 2025 – Present

- Maintain and enhance production applications for Zkript clients Cavalry and Hello Again (EVX).
- Diagnose and resolve production defects in a TypeScript codebase spanning React Native (Expo) apps, Next.js web applications, and NestJS and Express APIs.
- Work across PostgreSQL, MySQL, and MongoDB using Drizzle ORM, Prisma ORM, and Mongoose, including versioned schema migrations.

KEY PROJECTS

Cavalry

Zkript client | Australian engineering services firm | Next.js, NestJS, Express.js, Docker, OpenID Connect

- Maintain and enhance production web applications for Cavalry, including deployments serving end clients Santos and Arrow Energy.
- Deploy and configure applications across Cavalry, Santos, and Arrow Energy environments using Docker.
- Maintain the OpenID Connect single sign-on infrastructure that authenticates users across the client application suite.

EVX – Electric Vehicle Charging

Hello Again client (Zkript) | TypeScript, React Native, Expo, NestJS, Prisma ORM, TanStack Query, Stripe

- Implemented driver authentication for the EVX Expo (React Native) charging application.
- Implemented the Stripe payment system used for charging sessions.
- Implemented licence-plate lookup so drivers can add a vehicle from plate details.

Koobo – Travel Booking Marketplace

<https://www.koobo.ph> | Zkript product | Next.js, NestJS, MongoDB, Socket.IO, Docker

- Diagnosed and resolved a race condition in the payment and reservation flow where concurrent requests could produce inconsistent booking state.
- Re-architected Socket.IO message notifications: users previously received new-message events only inside a chat room, so implemented per-user notification rooms to reach a recipient anywhere in the application.
- Resolve production defects across the Next.js web application and NestJS API in a Turborepo monorepo backed by MongoDB.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

AMA Computer College – Fairview, Quezon City, Philippines | Graduated October 2025
